

# Even more flexible.

The **AllPro DS** takes the great attributes of the AllPro and combines with them with the increased rotation and shock absorption of an integrated DuraShock unit, all while decreasing the weight and build height compared to adding a DuraShock unit separately.

## 60° of Axial Rotation

The integrated DuraShock pylon provides rotation and shock absorption.

## Industry-Leading Flexibility

The split-toe, carbon composite design provides multiaxial movement and dynamic response.

## Perfect Heel Stiffness

The replaceable heel bumper lets you fine-tune heel stiffness for an even better experience.

**Foot Weight**  
25.6 oz.  
720 g

**Maximum Patient Weight**  
250 lbs.  
113 kg

**Build Height**  
8.75 / 10.75 in.  
22.2 / 27.3 cm

**Activity Level**  
K3 / K4
