

Move with confidence.

The **Aeris Performance LP** is a lightweight, low-profile walking foot that feels smoother on the ground and has better energy off the toe than other feet in its class.

Dual Pylon Design

The dual pylon design allows for a smoother rollover with a longer stance phase (effective foot length) without sacrificing the energy return expected of a dynamic response foot.

Split Keel & Pylon

Excellent frontal plane movement from full length split pylon and anterior keel.

Longer, Smoother Stance Phase

Excellent sagittal plane movement with minimal energy loss thanks to the dual pylon design.

Foot Weight
16.0 oz.
450 g

Maximum Patient Weight
275 lbs.
125 kg

Build Height
5.3 in.
13.4 cm

Activity Level
K3
