RAIZE
from Hosmer

The Raize is a unique microprocessor ankle/foot system in a low profile, lightweight design. Its plantar/dorsi-flexion range reduces damaging forces on the residual limb and greatly enhances stability on slopes and slippery surfaces. By simply pressing a button the wearer can control rollover resistance, lock or unlock the ankle, and adjust the heel height as needed. Visit us online at www.fillauer.com to see the Raize in action.
