

*it's all about*  
**Endurance**  
the Hosmer Endurance Hydraulic 160 Knee System

Some people believe that it's image that counts, at Hosmer we believe that it's all about Endurance. Using the short 160mm cylinder frame, common to other manufacturers, we designed the knee with a compact build height of a mere 8-3/8"/215mm and a total weight of 31oz/974g. This knee is sure to become the "go-to-player" that you can depend on to endure whatever life dishes out.

**Low Maintenance**

**Compact Size**

**Adjustable A-P Stability**

Weight Rated up to 300lbs
