

EVOLUTION SP LINER: ELEVATING THE ART OF CUSTOM INTERFACES: RELIABLE. COMFORTABLE. FRESH.

*EvolutionSP
Liner*

The Evolution SP liner is manufactured using a proprietary, platinum-cured silicone that is:

- Non-porous-* The absence of trapped bacteria eliminates unpleasant odor and discoloration.
- Biologically inert-* Unlike urethane, skin secretions will not cause the material to degrade or breakdown.
- Durable-* Independent testing found the Evolution SP to have tensile strength 4 times greater than its leading urethane competitor.
- Fully recoverable-* Load-bearing limbs do not permanently displace this material. Painful, flat-spots are no longer an issue.

Fresh Results: Gain everyday comfort with exceptional durability, allowing you to enjoy the finer things in life.

Available with or without a locking mechanism.

All orders shipped within 72 hours.

Save additional time and money by emailing your scan to liners@freedom-innovations.com.
