THE SMARTER CHOICE IN PROTECTION & COMFORT

## AFO LINER

The SmartKnit<sup>®</sup> AFO Liner<sup>™</sup> is a protective sleeve designed to cover AFOs and shield the skin from direct contact. By covering the AFO, not the leg, this innovative liner allows ankle foot orthosis wearers to enjoy sandals and other fashionable footwear while protecting the foot and ankle. Matching SmartKnit<sup>®</sup> socks may also be worn on the legs for a complete system.

SmartKnit's<sup>®</sup> unique technology provides the ultimate in comfort and protection for AFO wearers. The corespun fibers conform to the shape of the AFO eliminating pressure points caused by wrinkling or bunching. The hi-tech fibers also contain antimicrobial properties killing bacteria and eliminating odors while wicking moisture away from the skin.
