

SOLUTIONS THAT FIT™

"FINALLY, COMPRESSION I CAN WEAR!"

Core-Spun Support Socks for men and women look and feel like a soft, comfortable everyday sock with the added benefit of true gradient compression. The ultra stretchy yarns make the socks easier to put on and the added thickness makes the socks more comfortable for all-day wear.

A SUPPORT SOCK THAT IS EASIER TO PUT ON THAN TRADITIONAL COMPRESSION GARMENTS

With reasons ranging from limited mobility or dexterity to complaints about overall general comfort, many individuals struggle with donning or wanting to wear their compression garments every day.

Core-Spun by Therafirm® gradient compression socks, a patent pending innovation by Therafirm®, are made with the unique technology of core-spun yarns. These yarns are made using a process of twisting fibers around an inner fiber creating one yarn that enhances stretch, as well as strength and durability. Couple this technology with true gradient compression and the result is an ultra stretchy compression garment that is easier to put on and exceptionally comfortable.

WHAT PROVIDERS AND PATIENTS ARE SAYING ABOUT CORE-SPUN BY THERAFIRM

I know that compression garments can be difficult for my patients to don themselves. Many openly admit they have not worn the garments when I visit with them at follow-up appointments. I am so pleased to have seen an increase in patient compliance since I started recommending Core-Spun by Therafirm.

My mother has had to wear support hose since 1979, and she has always hated them because they were ugly, uncomfortable, hard to get on. Her provider started carrying your Core-Spun socks a couple of months ago and I got her a pair to try out. She liked them so much that I got her two more pair the next week. They are great!! They are comfortable, easy for her to put on – and they work! Thank you for making such a great product!

I wanted to tell you about my experience with Core-spun compression socks. It used to feel like you were putting a 100 pound leg in a 20 pound sock with other compression socks. They were impossible to get on and to pull them up. Core-spun are much different, they stretch more, so they are much easier to get on. I'm so glad that someone told me about them. They are the BEST thing that happened to compression socks!
