

POWER BELT

SOLUTIONS THAT FIT™

KNIT-RITE POWER BELT AUXILIARY SUSPENSION BELT®

Powerful high denier Lycra squeezes prosthesis to the body. Better body integration improves control and proprioception. Patients state, "My leg feels more like a part of me!"

- High acceptance, greater functional benefit
- Comfort and confidence for patient
- Patented dynamic material application is uniquely low profile, and comfortable
- Breathable material is cool and comfortable
- Latex free materials
- For daily use, at least two belts of each size and style selected should be provided to permit normal wearer hygiene

KNIT-RITE POWER SHORT AUXILIARY SUSPENSION BELT®

The Power Short Auxiliary Suspension Belt®, with continuous waist configuration, eliminates the bulk of velcro closures for the cosmetic appeal and comfort preferred by some patients.

The adjustable leg version allows the leg to be more fully opened, eliminating donning limitations. The non-stretch velcro leg closure with this option allows a custom purchase of the socket taper. The longer leg section provides greater socket containment.

Selection Guidelines: The wearable stretch/compression range of the Power Short Auxiliary Suspension Belt® is up to 8-10" in the waist and hip, depending on size and wearer preference. Most individuals prefer a size selection that creates 4-6" of stretch when worn for normal activity. Higher activity levels may benefit from a lighter fit, while some individuals prefer as little as 2" of stretch, especially when other benefits such as rotation control, are the main objective.
