Shrinkers[®]**

Knit-Rite's most recent innovation: the **Compressogrip[®] A/K Shrinker**. A/K Shrinkers for transfemoral applications provide superior clinical efficacy and donning ease — the same advantages as our original B/K Compressogrip Shrinker. And with fewer SKUs, they're easier to stock.

Knit-Rite developed a fabric that features stretch in all directions for improved fitting qualities. Additionally, increased power in the elastic provides a slightly heavier fabric than that used in traditional shrinkers. The Compressogrip A/K Shrinker also features a sliding belt design for universal right or left applications and is available in x-small, small, medium, and large sizes. Patent Pending.

Compressogrip A/K Shrinker Benefits:

- Clinically effective
- Easy to use and apply
- Multi-directional stretch for improved fit and comfort
- Fewer SKUs to inventory — easy and affordable to stock
- Faster delivery for inpatients
- Universal left or right application
- Cost effective
