

Same versatility. Heavyweight capability.

OMF2-HD Knee

Patients up to 275 pounds can have the medipro® OFM2 advantage: a two-in-one knee that converts from friction brake to manual lock with a single screw adjustment.

FEATURES

- **customizable** for increased or decreased mobility within the K1 and K2 range
- **lightweight**
- **friction brake** releases before un-weighting for smoother ambulation
- **designed** for K1 and K2 amputees weighing up to **275 pounds**
