WHEN DUST AND ODORS ARE AT THEIR WORST,

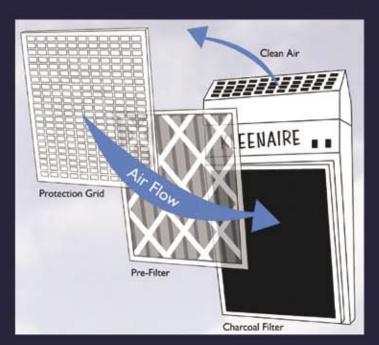

KLEENAIRE

IS AT ITS BEST.

Clean air is a major concern for orthotic and prosthetic facilities.

The Kleenaire dual filtered air purification system makes it easier to promote a healthier breathing environment for employees and patients.

The unique Kleenaire air purification system is an invaluable tool for making your facility OSHA compliant.

U.S. Patent D536, 432 S Proudly Made in the USA

Installation is a breeze!
Wall mounting is easy with the step-by-step instructions and accessories that are included.

No disruption to employees or operation of facility.

Uses standard power - 110 volt wall plug

Designed to re-circulate the air continuously
eliminating the need for costly duct work for
outside ventilation, which saves energy!

The pre-filter filters dust from the air while the unique cleansing qualities of the charcoal filter does not mask offensive odors but absorbs them. Read what one satisfied customer using the Kleenaire unit in his facility has to say:

"We were amazed at the immediate results we got from our Kleenaire fan. After it ran for 24 hours everyone in the facility was commenting on the improved quality of our air. No more offensive odors... I have bought 3 and will soon purchase another fan."
-Glenn Crumpton, CPO
