Continuing in the tradition of excellence, OPTEC is pleased to introduce the Stealth X and Stealth TLSO. Unlike closure systems on other braces that only provide compression, but no support, our unique polymer straps glide to reinforce the ergonomic posterior. Your patient will actively participate in rehabilitation by adjusting compression and support to the desired level, thus enhancing comfort, ease of use and patient compliance.

SUGGESTED
L0637

- Available in two strap & four strap designs
- Anterior opening for simple donning & doffing
- Posterior Panel automatically contours to your patient's lordosis
- Durable closure system does not tangle or need to be reset
- Hot & Cold therapy option relieves pain & promotes healing
- TLSO with ATE includes thoracic attachment of your choice (PPX, PPK, SPX, SPK)
