

OPTEC USA: READY WHEN YOU ARE...™

Oasis REHAB

The bivalve Oasis Rehab, with rigid anterior and posterior polymer panels, provides compression and stabilization from L1 to L5 vertebrae. The Rehab anterior is available in neutral or pendulous abdomen, the posterior is available in three (3) different degrees of lordosis resulting in an intimate fit that provides support, comfort, control and increased patient compliance.

PDAC APPROVED L0627

STOCK MODULAR BRACES

Our rigid modular spinal system is designed to restrict unwanted movement and control the spine in single or multiple planes of motion. Prefabricated stock sizes can be trimmed, molded or modified to provide your patients with an intimate custom fit. OPTEC USA's rigid spinal system provides superior stabilization and support that your patients need with the ultimate comfort they deserve.
