The 3-1 Stealth LSO LP system comes with rigid panels that can be customized for all stages of your patient's therapy. The revolutionary streamline design glides to provide smooth compression, comfort and increased patient compliance.

PDAC recently determined that L0637 is the appropriate HCPCS code for the Stealth LSO LP.

- Closure system offers mechanical advantages that allow for precise compression and increased spinal support
- Ergonomic Front & Back panels contour to patient's size and shape
- Back Panel automatically contours to your patient's lordosis
- Available in two strap and four strap designs
