SPINAL MANAGEMENT SYSTEM

PPK & SPK

OPTEC introduces two new thoracic support designs in the Pectoral Pad Kit (PPK) and the Sternal Pad Kit (SPK). Both the PPK and SPK feature the practical sliding bar for quick and easy adjustments above the xyphoid. Both are securely mounted just below the xyphoid and do not slide inferiorly onto the abdomen region. The PPK incorporates innovative pectoral pads with adjustable silicone swivels that provide balanced support and fit comfortably below the clavicles. The SPK's hinged sternal assembly conforms to your patient's sternum providing enhanced support and comfort.
