Here's one sure way to increase your Stock Value

Increase your stock value by reducing your inventory. You can reduce your inventory with the gender adaptable Oasis™ LSO & TLSO designs which provide firm support and soft comfort! The firm support is achieved by rigid polymer inserts in the front/back panels and multiple stays for lateral support. The soft comfort is provided by the spacer fabric panels which make the Oasis™ more breathable, slimmer and weigh less than any orthosis of its kind. The patient friendly closure design is easy for donning & doffing. You'll be astonished that such unbelievable comfort can produce such incredible support!
