# Oasis™ is no mirage!

## High Performance Orthoses with Dynamic Support

The OASIS spinal system is designed to provide immediate pain relief and comfortable support. Compression is provided to unload intervertebral discs and restrict unwanted motion. The OASIS is a fully adjustable, interchangeable modular spinal system.

The OASIS™ is fabricated from a revolutionary three dimensional spacer multi-tiered fabric. The surface fabric provides the comfort and durability necessary for a superior orthosis. The unique, air-spaced interior construction provides an intermediate layer through which heat and moisture are effectively transported, while supplying an air-cushioned, breathable sub layer. The final tier is the backing fabric which collects and disperses moisture and heat away from the body, thus keeping the patient dry and comfortable.

### Benefits:

- Breathable with temperature regulating properties that provide natural cooling & air circulation
- Wicks moisture away from the body for maximum comfort
- Lower volumetric weight compared to laminates
- Less bulky than laminates and it will not delaminate!
- Excellent recovery characteristics make this product compression resistant & great padding
- Durability and heavy-duty performance of spacer fabric for extended product life and supporting patients of all sizes
- Ideal for rehabilitation, prevention of skin breakdown & bedsores

3D spacer fabric helps wick moisture away from the body for maximum comfort

### Features:

- 5 gender adaptable sizes
- Adjustable, interchangeable modular system
- LSO & TLSO design
- MRI compatible
- Latex free
- Cut-to-size closure system
- Conforms to patient's body
- Simple donning & doffing
- Increased Patient comfort & compliance
- High Profile or Low Profile Designs (short waisted patients)

\$175.00

\$185.00\*

\*SPK & PPK not included

Easy Donning & Doffing • Rigid Polymer Inserts For Firm Support • TLSO with DLK (Dorsal Lumbar Support) • Cut-to-size Edge Straps • TLSO with SPK (Sternal Pat Kit)
