

C³TM — CALIFORNIA COMPRESSOR COMBOTM

The C3 provides support and pain relief following minimally invasive spine procedures. The C3 can also be used to augment a spinal rehabilitation program or alleviate pain for patients with chronic spinal conditions. The rigid components in this mid-profile design provide additional control during the acute phase of a spinal condition with the advantage of transforming into a more flexible system as healing occurs.

Features

- Xiphoid height Anterior ABS Panel
- Rigid ABS Posterior Panel
- CoolFoamTM lines all thermoplastic components
- Patented-compound closure system is simple to don/doff
- Patient-controlled compression tab to relieve pain and provide stability
- Design facilitates participation in daily living activities
- Transforms into an orthopedic grade corset as rehabilitation progresses

Indications

- Chronic low back pain
- Muscle strain
- Spondylolisthesis
- Activity-specific back pain
- Post-operative stabilization following:
 - Laminectomy
 - IDET procedures
 - Other surgical procedures
