

Be OWLS certified in 1 day!

Join us in Las Vegas this September at the
AOPA WORLD CONGRESS

The OWLS product line provides a unique opportunity for orthotists to work directly with wound care centers, podiatrists, and orthopedic surgeons that specialize in treating patients with Diabetic Peripheral Neuropathy. The OWLS program has a proven clinical track record of accommodating diabetic ulcers classified Wagner 1-4 with custom orthoses while correcting and stabilizing the ankle complex.

Attendees are listed as a Preferred OWLS facility on the Orthomerica website. As Orthomerica creates more awareness about these programs to wound care centers, physicians, and therapists, your company will benefit by getting direct referrals from Orthomerica!
