

MOVE NATURALLY

SAFETY • SYMMETRY • CONFIDENCE

With the first and only complete bionic leg.

Feedback from users and prosthetists has been overwhelmingly positive, indicating feelings of increased safety, symmetry and confidence that result in a regained ability to move naturally.

SAFETY	SYMMETRY	CONFIDENCE
<p>64% of users report a reduction in tripping</p>	<p>53% of prosthetists report reduced hip hiking.</p>	<p>93% of users report increased confidence.</p>
