

K2 SENSATION[®] WITH **NEW** D/P FLEXION

Natural Ankle Motion

K2 Sensation is a comfortable walking prosthesis that provides smooth progression from heel strike to toe-off. And now, with the D/P Flexion hydraulic ankle module, it offers up to 9° of dorsi and plantar-flexion to help improve stability and reduce the risk of trips and falls. Add our zero-build-height Unity[®] pump module for the only sleeveless elevated vacuum solution for less active users.

Both D/P Flexion and Unity are retrofittable to existing K2 Sensation feet.
