# ICEROSS® SEAL-IN® X

Make your move

With a moveable seal ring to ensure optimal seal positioning, Seal-In X offers both maximum comfort for users with uniquely-shaped or sensitive limbs and easier donning and doffing for users with compromised hand dexterity. Seal-In X also features seamless Anatomy Conforming Fabric, a durable yet flexible weave that comfortably controls soft tissue and elongates over the knee without bunching in the popliteal region. Plus, Seal-In X is Unity® compatible, so your patients can experience all the benefits of sleeveless vacuum, as well.

**UNITY™  
COMPATIBLE**
