

PRO-FLEX[®]

Less load, more dynamics[™]

Pro-Flex is more than a foot. It's a family. All Pro-Flex feet feature a unique 3-blade design with a footblade that incorporates a full effective toe lever and a more anatomical split toe. This innovative design helps generate exceptional mechanical power and a fluid, natural progression from heel strike to toe-off.

Add Unity sleeveless vacuum for excellent suspension and volume control with no added build height and minimal added weight.
