

SYMBIONIC[®] LEG 3

Move Naturally

As the first prosthesis to integrate a microprocessor knee and powered microprocessor ankle, the original SYMBIONIC LEG won the prestigious Popular Science "Best of What's New" Award in 2012.

SYMBIONIC LEG 3 takes this innovative technology to the next level, with a faster swing extension, a new kinematic sensor for added stability and a more powerful actuator for increased resistance across a wider range of stance flexion.
