

# ICEROSS® SYNERGY. BECAUSE STABILITY AND COMFORT CAN CO-EXIST.

When it comes to liners, the new Iceross Synergy is at the top of its game. Two silicone durometers work together: one layer absorbs shock, the other protects and supports.

The Active Skin Care keeps skin fresh and conditioned, while the superior flexibility of the Iceross Wave offers a controlled fold. Stability, comfort and durability—integrated into one liner.

*The New Iceross® Synergy from Ossur.*

**THE WAVE FEATURE.** The Iceross Wave feature allows a controlled folding of the liner in the sensitive area behind the joint.

**THE WAVE FEATURE.** The Iceross Wave feature also expands easily across the patella, reducing the level of pressure on this area.

**DOUBLE DUROMETER—STABLE.** An outer layer of stiffer silicone provides outstanding stability and durability.

**DOUBLE DUROMETER—SOFT.** A softer inner layer nurtures the skin with Aloe Vera and helps protect the limb from impact.

**ACTIVE SKIN CARE.** Soothing ingredients like Vaseline® and Aloe Vera are incorporated in DermaSil™ silicone to maintain healthy, strong skin.
