## THE IDEAL BALANCE OF STABILITY AND COMFORT.

Without proper support, even the simplest activities can be painful and potentially disastrous. That's why Iceross liners are engineered to provide a solid walking foundation. Ossur's exclusive Stabilizing Matrix provides extraordinary stability. Our unique Size-Specific Umbrella prevents distortion, improves suspension, and maximizes comfort. Using silicone in all Iceross liners enables us to design in varying levels of softness and strength for a careful balance of liner and lifestyle. And it allows us to incorporate Active Skin Care supplements such as Aloe Vera and Vaseline® for added comfort.

Whatever the lifestyle, Iceross is always the ideal solution.
