

YESTERDAY YOU COULD IMPROVE YOUR PATIENTS LIVES.  
TODAY YOU CAN TRANSFORM THEM.

Imagine the day when the way your patients' walk is determined by their own gait, not by the limitations of their prosthesis. Imagine them being more confident, more secure and less fatigued. Imagine them wearing a bionic knee so revolutionary that it adjusts their resistance to varying loads and walking speed up to 1000 times per second. With Ossur's RHEO KNEE, imagination becomes reality. Learn how our bionic technology can transform your practice by transforming your patients' lives.
