

*"Some men see things as they are and ask why.
Others dream things that never were and ask why not."*

— GEORGE BERNARD SHAW

**BIONICS USED TO BE SCIENCE FICTION.
OSSUR MAKES IT SCIENCE FACT.**

It takes revolutionary innovations that enable amputees to live a life without limitations. That's why Ossur is working hard to meet the challenge of building advanced bionic devices. Through integration of sensors, microprocessors, software, artificial intelligence, and electromechanical actuators, Ossur is creating advanced bionic technology to assist in restoring normal sensory and mobility functions to the amputee. And this is only the beginning. Ultimately, we see the day when bionically-based prosthetics completely mimic the function and dexterity of an intact limb.
