C-Leg[®] 4

Know the difference

Convenient control

Thanks to new hardware and an updated Cockpit™ app, the new C-Leg 4 is now compatible with Apple iOS, making it the only MPK on the market that can communicate with both Android and Apple iOS-based smartphones.*

Customized fittings

The new C-Soft Plus 1.6 incorporates step-by-step video instructions to help guide you through the fitting process, and a wider selection of prosthetic feet means faster, more individualized fittings for your patients.

Robust design

In addition to all of the intelligent features you've come to rely on, the new C-Leg 4 includes a more robust design and an improved battery cover to provide even better protection for the internal components.

Quality for life
