Empower by Ottobock

It's more than a foot, it's a foundation.

Power, security, and real-time adaptation. The Empower microprocessor foot is the only prosthetic foot with powered propulsion. Give your patients an active ankle joint that provides power, even on ramps, stairs, and hills. The added security of real-time adjustments to terrain will help patients gain the confidence needed to return to daily life at home and work. Help your patients own their outcome.

Quality for life
