

C-Leg®

Studied, proven, preferred.

As the original microprocessor knee with more fittings worldwide than any other MPK, C-Leg is the most trusted prosthetic knee joint available for above-knee amputees. With more than 55 published studies proving C-Leg's clinical benefits, it's easy to see why:

- Users experience up to an **80% reduction** in falls*
- **94% of users prefer C-Leg** over their previous knee**
- **97%** of users experienced the **Intuitive Stance function as useful****
- **70%** of users state improved stance on slopes, **comfort while walking** and perceived **safety while standing****
- **Users report improved walking at all speeds** when compared to their previous prosthesis***

Are you part of the 95% of practitioners who recommend C-Leg?***
