

No Matter How You Spin It

The C-Leg® Gets Your Patients Moving

It takes more than determination to overcome life-changing obstacles. It takes the right equipment.

For "Health Club Harry," that means the C-Leg® microprocessor knee.

Since losing his leg in 2004, Harry has continued to whirl through life. He relies on the remarkable stability and programmable versatility of the C-Leg. By optimizing settings such as the Dynamic Factor, Harry conquers any obstacle.

Help your patients surmount their obstacles and cross the finish line with the C-Leg. Call **800.328.4058** (U.S.) or **800.665.3327** (Canada) to speak with your local Otto Bock Sales Representative.
