

Make Vacuum Your First Choice

Harmony® P3 and Harmony® e-pulse Vacuum Systems

Lighter, sleeker, and with a lower profile than its predecessors, the Harmony P3 enables more patients to benefit from its superior technology. The Harmony P3 offers vacuum generation, vertical shock absorption and torsion via a single Functional Ring.

Choose the Harmony e-pulse system for above-knee vacuum applications or when clearance is an issue. Its simple electronic design maintains the proper vacuum setting and doesn't require any structural height.

Get the benefits of vacuum for all your patients.
