Quality for life

Embrace The Everyday with Michelangelo®

Help your patients do more

Give your patients the intuitive, responsive functionality they need. The new FDA-approved Michelangelo hand mimics the appearance and function of the natural hand like no other myoelectric with soft fingertips, a flexible wrist that locks in various positions, and a wide open palm to make it easier to hold or grasp items.

Michelangelo is the answer to how your patients can get greater function with seven different hand positions and a powerful grip function. Talk to your Ottobock Sales Representative or call 800.328.4058 to find out how your patients can embrace the everyday with Michelangelo.
