Quality for life

Genium[®]

Walk naturally.

The remarkable Genium[®] Bionic Prosthetic System from Ottobock has opened a whole new realm of mobility. Walk backwards, forwards, upstairs and down – and step over everyday obstacles with ease. It's the closest technology has come to a natural, physiological gait.

Learn more about the proven benefits of Ottobock's advanced microprocessor knees at www.ottobockus.com/clinicalstudies.

And remember, the Genium goes great with any of Ottobock's newest feet: the lightweight Triton carbon fiber foot; the Triton Vertical Shock; the Triton Harmony[®] with integrated vacuum technology; the new Triton Low Profile and Triton Heavy Duty.
