Quality for life

The New C-Leg[®]

Confidence in the next step.

Thousands of fittings, dozens of studies — we've taken advantage of all that experience to make a great product even better. With its incredible security and new improvements, the C-Leg microprocessor-controlled knee continues as the Standard of Care for above-knee amputees.

- Improved swing phase control
- Optimized stumble recovery
- Max. body weight: 300 lbs
- Additional activity mode
- Attached silicone caps for splash protection
- Remember, the pylon is included!
