Quality for life

# Comfort, security, reliability

## All in one vacuum system.

Start with the new Triton Harmony® foot, which integrates the functionality of the Triton carbon fiber foot with the proven Harmony® P3 vacuum technology. Patients get reduced volume loss plus better proprioception and connection for increased safety and comfort. All this in an integrated one-piece foot design!

Add the innovative Anatomic 3D PUR Urethane Liner (thicker where protection is needed and thinner where flexibility is required). Combine it with the ProFlex sleeve for easy flexion and a secure seal.

Contact your sales representative at 800.328.4058 for more details.
