## A standing ovation!

Larry's a prosthetist who works with a prosthetist. Brad's an amputee who works with amputees. By working together they have a unique perspective on finding the best solutions for their patients.

Just like you. Please join us in giving yourself a hand—along with all the other prosthetists, therapists, technicians, and endusers out there—for helping to make the C-Leg the most studied, most fit MPK in the world.
