# bebionic™

The world's most lifelike bionic hand

Quality for life

**Comfortable,  
intuitive, precise**

The bebionic hand helps people with upper-limb loss improve body position when doing things like riding a bicycle

**14 different grip patterns**

The bebionic hand provides 14 different grip patterns, offering users a more complete device that assists them in their day-to-day lives

**Two selectable  
thumb positions**

The innovative hand features two selectable thumb positions: opposed and non-opposed
