

He refuses
to be defined by
what he's lost

Thomas Bourgeois is a Paralympic athlete who sprints, throws shot put and runs the 400m in under 60 seconds — wearing advanced carbon fiber composite feet from Otto Bock. Custom built for Thomas' height, weight and activity level, this advanced device has helped resume all of his normal daily activities. When he was able to dance at his own wedding, his joy was inspirational. We're proud of every step he takes.
