

# Natural look. Natural feel. Exceptional durability.

Handcrafted for life

Otto Bock Health Care now offers a full line of Custom Silicone products from partial hands and feet to custom liners, you'll experience the best in durability and cosmesis. With nearly a century of experience in modular prosthetics, you can count on getting more than just a beautiful product. We use only the best medical-grade silicone for a long-lasting, quality product. And we mix the color you select into the silicone, not just on the surface, for a more natural look and increased durability.

The process is simple. Just send our highly-skilled technicians a photo and a cast to ensure that color and shape closely match your patient's sound side or the look they desire. Or, you can customize a liner with varying durometers, soft pads, and other elements that help you offer the best functionality to your patient.

To get started with a project or for more information, call us at 800.665.3327, ext. 280, to speak directly to our highly trained technicians.
