

Get Comfortable With Our Family

Breakthrough Solutions in Patient Health & Comfort

The global leader in the development of orthotics and prosthetics, Otto Bock HealthCare is keenly aware of the role that the interface between the socket and residual limbs plays in protecting the skin, reducing friction, and improving suspension.

Our extended family of Patient Comfort liners and accessories is designed to create a healthier socket environment, improve patient outcomes—and enhance patient comfort.

One-Call Convenience

With one call to Otto Bock, you can satisfy the prosthetic needs of almost every patient. Turn the page to acquaint yourself with the advantages of Otto Bock's Patient Comfort liners —then give us a call at **800-328.4058** or visit us at www.ottobockus.com with any questions.

Otto Bock[®]
QUALITY FOR LIFE

Meet Otto Bock's Extended Family of Patient Comfort Liners

Patients come in all shapes and sizes—and so do our liners. Need a liner for a specific patient? Want a durable off-the-shelf product or a uniquely shaped custom liner? Look no further than Otto Bock HealthCare's innovative family of Patient Comfort liners.

Backed by strong warranties, Otto Bock has the broadest range of Patient Comfort liners in the industry —plus Professional Services personnel to help you find the right product for each patient's needs.

Free Patient Comfort Brochure

For a brochure with detailed information about our entire line of Patient Comfort products which includes liners, socks, sealing and suspension sleeves, shuttle locks, postoperative and skin health products, call us at 800.328.4058 in the US or 800.665.3327 in Canada.

Everyone pictured here uses their own unique combination of prosthetic components.

Patient requires the exceptional cushioning properties of urethane to accommodate deep invaginations, bony prominences or unique shapes

Amputation Level All

Activity Level Low-Moderate-High

Otto Bock Solution
Custom Urethane Liner

Benefits

- Perfectly reflects the patient's residual limb
- Reduces forces, provides cushioning comfort
- 3-day turn-around time

Patient requires a liner designed to enhance the function of the Harmony® Volume Management System

Amputation Level All

Activity Level Low-Moderate-High

Otto Bock Solution
Custom Harmony® Liner (Urethane)

Benefits

- Standardized features maximize the benefits of use with a Harmony® System
- Easy to order with a convenient casting tool
- 3-day turnaround

Patient has unique residual limb topography and liner breakdown is an issue

Amputation Level All

Activity Level Low-Moderate-High

Otto Bock Solution
Custom Silicone Liner

Benefits

- Extremely durable
- Medical-grade silicone resists liner breakdown
- Hand-crafting lets you target bony prominences
- Custom colors, covers and connectors
- Highly customizable

Patient tends to hip hike due to longitudinal travel of his liner, consistent donning is also an issue

Amputation Level Transfemoral

Activity Level Low-Moderate

Otto Bock Solution
TF Adapt (Prefabricated Silicone Gel Liner)

Benefits

- ZERO pistoning
- High horizontal elasticity makes it easy to don and doff
- Unsurpassed bullet-proof durability backed by 1-year warranty

Patient seeks a durable, secure-fitting liner with cushioning properties during static and non-static loading

Amputation Level Transtibial

Activity Level Low-Moderate-High

Otto Bock Solution
Silicone Gel Liner (Prefabricated & Interchangeable with the TechnoGel Liner)

Benefits

- Pliable
- Highly resilient
- Unsurpassed bullet-proof durability backed by 1-year warranty

Patient has highly sensitive skin and would benefit from durable urethane material

Amputation Level Transtibial

Activity Level Low-Moderate-High

Otto Bock Solution
TechnoGel® Liner (Prefabricated & Interchangeable with the Silicone Gel Liner)

Benefits

- Unique aliphatic polyurethane distributes pressure and won't irritate skin
- Flexible and easy to don
- Unsurpassed bullet-proof durability backed by 1-year warranty

Active patient has bony prominences in the transtibial area

Amputation Level Transtibial

Activity Level Moderate-High

Otto Bock Solution
Profile® Liner (Prefabricated Anatomically Shaped Urethane)

Benefits

- Provides a near-custom fit and more flexibility
- Thicker wall in distal area
- Thinner proximal wall for enhanced knee flexion

Patient has pressure sensitivity at the distal end of the residual limb

Amputation Level Transtibial

Activity Level Low-Moderate

Otto Bock Solution
Simplicity Liner (Prefabricated Cylindrically-Shaped Urethane with extra urethane in distal area)

Benefits

- Soft urethane composition promotes comfort
- Extra padding around distal circumference
- Available in five sizes, with or without locking mechanism

Patient has a cylindrically shaped limb and extra-sensitive skin at the distal end of the residual limb

Amputation Level Transtibial and Transfemoral

Activity Level Low-Moderate

Otto Bock Solution
Sirona Liner (Prefabricated Cylindrically-Shaped Urethane)

Benefits

- Extra-soft urethane composition promotes comfort
- Available in tapered and uniform thicknesses
- Available with or without locking mechanism

Patient is an AK amputee requiring exceptional distal protection

Amputation Level Transfemoral

Activity Level Low-Moderate-High

Otto Bock Solution
AKquire Liner (Prefabricated Non-Stick Urethane/Shorter Design)

Benefits

- Thin proximal wall ensures ideal liner termination within socket
- Trimable design prevents bunching
- Can be used as a distal cap

We Know Sockets!

Not only can you expect expert craftsmanship from the leader in custom liners, you can enhance patient outcomes by reducing forces to the limb with the Harmony® Volume Management System.

To learn more about optimizing socket environment and improving skin health with the revolutionary Harmony® Volume Management System, sign up for a two-day Harmony® Certification Course packed with hands-on learning. Classes fill quickly, so register and plan to bring a patient model. Just visit www.ottobockus.com or call 800.327.4058.

The two-day Harmony Certification Course will be offered on the following dates in 2004.

Sep 16-17, 2004

Oct 14-15, 2004

Nov 11-12, 2004

Dec 9-10, 2004

Visit ottobockus.com for a complete course list or call **800.328.4058** to register.

To Order

If you have any questions, or would like to place an order, please call 800.328.4058 or visit us online at www.ottobockus.com.
