

# Mmm. Beefier.

Otto Bock has mechanically tested our time-honored components and modified select items to meet your need for a higher weight rating. The products to the right are rated up to 330 lbs/150 kg, and deliver what you demand: quality and durability.

Like the picture above, we also developed the MOBIS\* system to easily identify the weight rating of specific products—you'll notice it on our packaging. Call now at (US) **800.328.4058** or (Canada) **905.829.2080** to order or for a complete reference poster.

\* The Otto Bock MOBIS Mobility System is NOT intended to be used in the U.S.A as a guide to obtaining reimbursement for prosthetic components.

-  **5R2** Lamination Plate
-  **5R1** Socket Attachment Block
-  **4R111** Rotatable 4 Prong Adapter With Adjustment Screws
-  **4R116** Rotatable 4 Prong Adapter With Pyramid
