October 4 & 5, 2007
November 1 & 2, 2007

Testimonials

"Blisters, burns, itching, and pain all came, and went, and came again. They all disappeared - and never returned - once I was in an AK socket using Stan's vacuum-assisted suspension. It is the most comfortable socket I have ever worn."

- John J. Farley III (AK Amputee for Over 30 Years)

"Great course, explained in a very down to earth fashion! Looking forward to trying the system."

- David Rotter, CPO - Sheck & Sirens - Chicago, IL

"I've been an amputee for over 40 yrs., this is the most comfortable and best aligned prosthesis I have ever had. The lower trimline gives me greater freedom of motion. Thank Stan for making the world of an amputee natural."

- Tim Quinn (AK)
