

JUST ADDED! PrimeFare East's Keynote Address will focus on the national drive for O&P parity legislation.

Tenth Annual PrimeFare East Regional Conference

For the past nine years O&P professionals from across the southeast region have relied upon the annual PrimeFare East Conference for a first class scientific symposium that is close to home. This year's agenda continues that tradition by offering a prosthetic track that gives attendees the chance to compare similarities and differences between the (3) leading microprocessor vacuum pumps, with back-to-back presentations from:

Ohio Willow Wood • Otto Bock HealthCare • Smith Global

Sessions will be followed by a forum with representatives from each company responding to questions from attendees.

Additionally the PrimeFare East Regional Conference offers:

- A full range of prosthetic presentations with up to 12 CEUs available!
- Up to 12 CEUs available in the orthotics track!
- A post-mastectomy track that is NEW to PrimeFare East this year!
- Administrative courses to help keep the business side running smoothly!
