

LET US LAMINATE YOUR ELEVATED VACUUM SOCKETS

WITH E-R RESIN

The only resin that does not need an inner liner to seal for vacuum.

Sockets are heat adjustable, repairable, lighter, and stronger.

Guaranteed 10% more economical than other, similar sockets.

Superior strength means less composite material or carbon needed.

Purchase E-R RESIN for use in your lab. PRS offers educational classes on E-R Resin's proper use.
