

EZ stride

New "EZ Stride - ATB (Anterior Tibia)!!!"

- SADMERC Approved L1932
- Floor reaction device that maximizes the storage and release of energy
- Improved design minimizes contact on the tibia bone
- Only contacts patient at the proximal tibia and footplate
- Less skin contact increases overall comfort
- Custom to cast, custom to measurement, and/or prefabricated available

New "EZ Stride - ALS (Ankle Lock System)!!!"

- Easily attaches to any EZ Stride orthosis (Medial or Lateral)
- Genuine leather increases durability, comfort, and style
- Infinitely adjustable hook and loop strap
- Highly effective in preventing pronation or supination
- Effectively stabilizes and prevents ankle rotation
- Will fit into any shoe and will work with all versions

New "EZ Stride - MLDS (Medial-Lateral Dual Strut)!!!"

- Maximum ankle control and stability
- Effectively doubles the strength and support
- Fully customizable to cast or measurement
- Prefabricated version available (xs, sm, med, or Lrg)
- Will fit into any shoe
- Full one year warranty
