Totally Hip Orthotics

A System for Every Application and budget

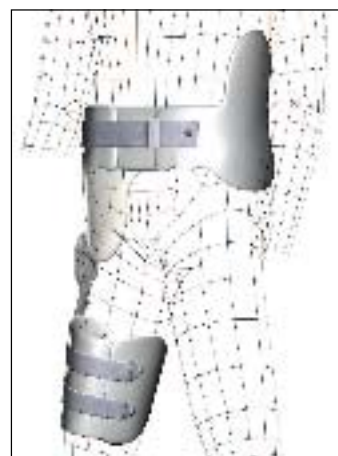

Guardian Hip Orthosis

- Total Universal System (pelvic and thigh)
- Total Rotational adjustment (pelvic and thigh)
- Locking anterior tongue system
- Convertible straps provide left or right hand pull
- SM through XL sizes

MC Hip Control Orthosis

- Maximum control of the pelvic girdle
- LSO trim lines provide greater control
- Unique tongue and groove locking mechanism on the anterior panel bridges the opening and locks the anterior panel which eliminates twisting
- Contralateral and lateral extensions increase stability and discourage forces that contribute to dislocation
- Custom to measure or cast

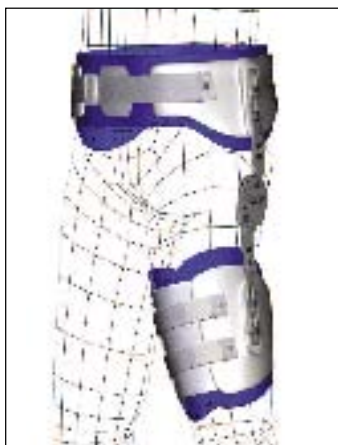

CHM Hip Orthosis

- Distal, contralateral extension prevents patient from exerting forces that contribute to dislocation
- Proximal, lateral extension extends past the greater trochanter for increased stability
- Pelvic panel provides full contact on the pelvic girdle
- Posterior panels overlap and lock for greater stability
- Custom to measure or custom to cast

The Minuteman Hip Orthosis

- Most Economical
- Single panel design
- Anterior opening with tongue
- Universal or side specific
- XSM through XXX sizes

Sentry Hip Orthosis

- Circumferentially adjustable
- Rotational adjustment
- Universal or side specific
- Male or Female configurations
- SM through XL sizes
- Thigh cuff side specific
- Quick connect buckle
