

Finally, a night-time brace that works around the clock

A recent study shows that the Providence brace, a spinal orthosis worn only at night, is just as effective in the treatment of adolescent idiopathic scoliosis as full-time braces. That's important, because compliance increases when braces don't interfere with a child's everyday life. The Providence is also effective for obese, juvenile and neuromuscular patients.

Spinal Technology is proud to be the exclusive manufacturer of the Providence.

For the published clinical study proving the efficacy of the Providence, contact your Spinal Technology sales representative, or call us for a copy.
