

i-LIMB Hand

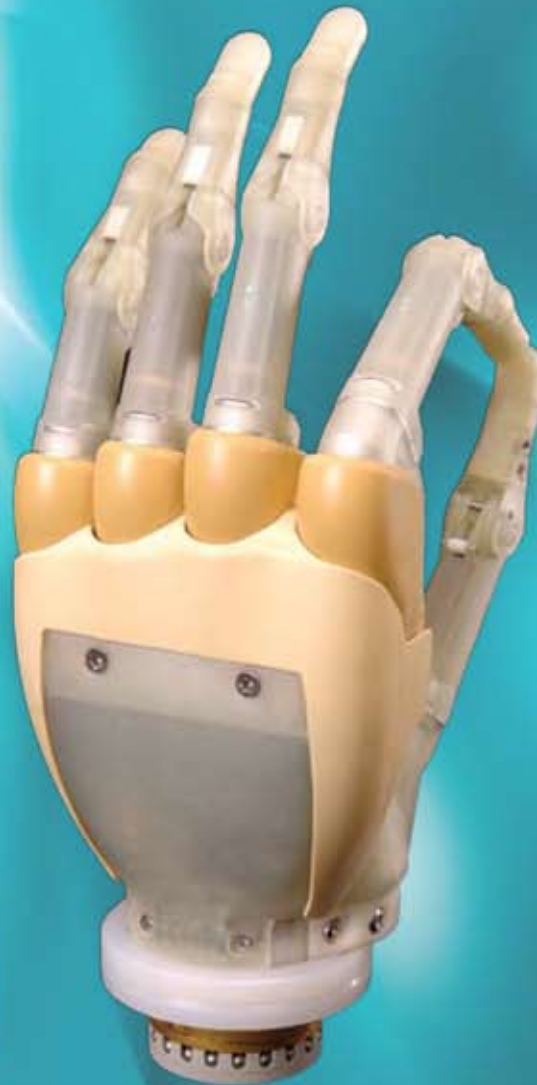

transforming everyday lives

Key Grip - Unique to i-LIMB, allows holding items such as a plate, business card, key, etc.

Power Grip - Enables users to wrap their prosthetic hand completely around an object increasing grip strength and reducing premature releases.

i-LIMB thumb can rotate through various grip positions in similar manner to the human thumb.

Index Point - facilitates operation of security key pads, ATM cash machines, cell phones key pads, touch screen registers, etc.

Precision Grip - increases dexterity and fine motor control capability by allowing user to pick up and hold small or thin objects
